OPINTO-OIKEUDET

Myöntäjä	Luonnontieteiden ja metsätieteiden tiedekunta
Organisaatio	Fysiikka ja matematiikka (J)
Voimassaolo	28.11.2013 - 15.06.2017
Opintojen aloitus	01.08.2013
Tutkintoasetus	Valtioneuvoston asetus yliopistojen tutkinnoista n:o 794/2004
Tavoitetutkinto	Filosofian tohtori, luonnontieteet
Koulutus	Luonnontieteen, teknologian ja laskennan tohtoriohjelma
Pääaine	Matematiikka
Tutkinnon suorituspäivä	15.06.2017
Väitöskirja	Methods for Complex ODEs Based on Localization, Integration and Operator Theory
Arvosana	Hyväksytty
Suorituspäivä	15.06.2017

Suoritukset ajalta: 14.03.2011 - 15.06.2017

Opintosuoritusten arvostelu

5/5 = erinomainen

4/5 = kiitettävä

3/5 = hyvä

2/5 = tyydyttävä

1/5 = välttävä

tai HYV = hyväksytty

Toisen kotimaisen kielen hyväksytty taito arvostellaan asteikolla tyydyttävä taito (T) tai hyvä taito (H). Toisen kotimaisen kielen numeerinen arvostelu sijoittuu asteikolla seuraavasti: 1-3 = tyydyttävä taito (T), 4-5 = hyvä taito (H).

Tutkielmien ja väitöskirjan arvostelussa käytetään myös asteikoita

L = laudatur

ECL = eximia cum laude approbatur

MCL = magna cum laude approbatur

CL = cum laude approbatur

NSA = non sine laude approbatur

LA = lubenter approbatur

A = approbatur

tai

hyv hyväksytty

tai

K/E kiitettävä/erinomainen

H hyvä

T tyydyttävä

V välttävä

Opintojen mitoituksen peruste on opintopiste. Yhden lukuvuoden opintojen suorittamiseen keskimäärin vaadittava 1 600 tunnin työpanos vastaa 60 opintopistettä.

Perusopintojen laajuus on vähintään 25 opintopistettä. Aineopintojen laajuus on yhdessä perusopintojen kanssa vähintään 60 opintopistettä. Syventävien opintojen laajuus on vähintään 60 opintopistettä.

Explanation of Transcript Grading Systems:

5/5 Excellent
4/5 Very good
3/5 Good
2/5 Satisfactory
1/5 Sufficient
Pass Course completed successfully

Approved courses in the Second Domestic Language (Swedish or Finnish) are graded with the scale satisfactory (T) - good (H). The numerical grading scale of the Second Domestic Language is the following: 1-3 = satisfactory (T), 4-5 = good (H).

In grading of thesis and dissertations, also the following scales are used

L laudatur
ECL eximia cum laude approbatur
MCL magna cum laude approbatur
CL cum laude approbatur
NSA non sine laude approbatur
LA lubenter approbatur
A approbatur
or
AppD Approved with Distinction
App Approved
or
K/E Excellent
H Good
T Satisfactory
V Sufficient

The measure for the extent of studies shall be a credit point. The average input of 1600 working hours needed for studies of one academic year shall correspond to 60 credits.

The combined extent of basic and intermediate studies shall be a minimum of 60 credits.

DIPLOMA SUPPLEMENT

This Diploma Supplement follows the model developed by the European Commission, Council of Europe and UNESCO/CEPES. The purpose of this supplement is to provide sufficient independent data to improve the international 'transparency' and fair academic and professional recognition of qualifications (diplomas, degrees, certificates, etc.). It is designed to provide a description of the nature, level, context, content and status of the studies that were pursued and successfully completed by the individual named on the original qualification to which this supplement is appended. It should be free of any value-judgements, equivalence statements or suggestions about recognition. Information should be provided in all eight sections. Where information is not provided, a reason should be given.

1 INFORMATION IDENTIFYING THE HOLDER OF THE QUALIFICATION

- | | |
|--|------------------------|
| 1.1 Family name(s): | Huusko |
| 1.2 Given name(s): | Juha-Matti Aleksanteri |
| 1.3 Date of birth (day/month/year): | 20.04.1987 |
| 1.4 Student identification number or code: | 175783 |

2 INFORMATION IDENTIFYING THE QUALIFICATION

- | | |
|---|--|
| 2.1 Name of qualification and title conferred (in original language): | Filosofian tohtori
(Doctor of Philosophy) |
| 2.2 Main field(s) of study for the qualification: | Doctoral Programme in Science, Technology and Computing
Mathematics |
| 2.3 Name and status of awarding institution (in original language): | Itä-Suomen yliopisto / Luonnontieteiden ja metsätieteiden tiedekunta
(University of Eastern Finland / Faculty of Science and Forestry),
state recognised university, Decree on Higher Education Degree Structure 464/1998.
The quality assurance system of the university has passed the audit conducted by the Finnish Higher Education Evaluation Council. The auditing certificate is valid for six years (until 21.4.2023). |
| 2.4 Name and status of institution (if different from 2.3) administering studies: | Not applicable |
| 2.5 Language(s) of instruction/examination: | Finnish |

3 INFORMATION ON THE LEVEL OF THE QUALIFICATION

- | | |
|-----------------------------------|--|
| 3.1 Level of qualification: | Doctoral degree. See 8. |
| 3.2 Official length of programme: | The degree consists of at least 240 credits, 4 years of full-time study. Finnish credits are fully compatible with the ECTS. |

DIPLOMA SUPPLEMENT

3.3 Access requirement(s):

The Finnish Matriculation Examination gives general eligibility for higher education. General eligibility is also given by Finnish upper secondary vocational qualifications. These qualifications require at least 12 years of schooling. Equivalent foreign qualifications also give general eligibility for higher education.

There is numerus clausus, i.e. restricted entry, to all fields of study. See 8.

4 INFORMATION ON THE CONTENTS AND RESULTS GAINED

4.1 Mode of study:

Full-time

4.2 Programme requirements:

In Finland, postgraduate education and doctoral degrees come under the provisions of the Government Decree on University Degrees (794/2004).

In accordance with Section 21 of the above mentioned Decree, the aim of postgraduate education is

- 1) that the student becomes well-versed in his/her own field of research and its social significance and gains knowledge and skills needed to apply scientific research methods independently and critically and to produce new scientific knowledge within his/her field of research;
- 2) becomes conversant with the development, basic problems and research methods of his/her own field of research; and
- 3) gains such knowledge of the general theory of science and of other disciplines relating to his/her own field of research as enables him/her to follow developments in them.

In accordance with Section 22 of the above mentioned Decree, to be awarded a doctorate, the student must:

- 1) complete the required postgraduate studies;
- 2) demonstrate independent and critical thinking in the field of research; and
- 3) write a doctoral dissertation and defend it in public.

The University of Eastern Finland accepts monographs and article-based dissertations as

DIPLOMA SUPPLEMENT

4.3 Programme details (e.g., modules or units studied), and the individual grades/marks/credits obtained

(if this information is available on an official transcript this should be used here.):

4.4 Grading scheme and, if available, grade distribution guidance:

doctoral dissertations. A monograph is a scholarly work written on a specific topic by the doctoral candidate alone. An article-based dissertation includes a sufficient number, as deemed by the university, of scientific publications or manuscripts accepted for publication on the same set of problems and a paper summarising the findings, or some other work which meets corresponding scientific criteria. The publications may include co-authored publications if the doctoral candidate's independent contribution to them can be demonstrated (Government Decree on University Degrees 794/2004, Section 22).

See transcript of records.

Study attainments are assessed on the scale pass-fail. Passed study attainments can also be assessed on the following grading scale: sufficient (1), satisfactory (2), good (3), very good (4), and excellent (5). Furthermore, theses completed in advanced studies, licentiate theses and doctoral dissertations can be graded on the following seven-stage scale: *approbatur*, *lubenter approbatur*, *non sine laude approbatur*, *cum laude approbatur*, *magna cum laude approbatur*, *eximia cum laude approbatur* and *laudatur*; or on the scale satisfactory, good and excellent; or on the scale pass and pass with distinction.

The assessment of language skills in the second domestic language uses the scale satisfactory-good; as laid down in the Act on the Knowledge of Languages Required of Personnel in Public Bodies (Laki julkisyhteisöjen henkilöstöltä vaadittavasta kielitaidosta 424/2003) and the Government Decree on the Demonstration of Language Skills in the Finnish and Swedish Languages in State Administration (Valtioneuvoston asetus suomen ja ruotsin kielen taidon osoittamisesta valtionhallinnossa 481/2003).

Not applicable

4.5 Overall classification of the qualification:

5 INFORMATION ON THE FUNCTION OF THE QUALIFICATION

5.1 Access to further study:

Not applicable.

DIPLOMA SUPPLEMENT**5.2 Professional status:**

Under the Finnish legislation, a person who has taken the degree of Doctor of Philosophy is qualified for posts or positions in the public sector for which the qualification requirement is a doctoral degree. In some cases, the qualification requirement also includes the completion of minor or major studies in certain specified fields of study. The degree falls under the Article 11 of the Directive 2005/36/EC of the European Parliament and of the Council on the recognition of professional qualifications, level e.

6 ADDITIONAL INFORMATION**6.1 Additional information:**

Joensuun yliopisto (University of Joensuu) and Kuopion yliopisto (University of Kuopio) have merged into Itä-Suomen yliopisto (University of Eastern Finland), as of 1.1.2010. Both Joensuun yliopisto and Kuopion yliopisto were state recognised universities.

7 CERTIFICATION OF THE SUPPLEMENT**7.1 Date:**

15.06.2017

7.2 Name and signature:

Taru Nyland
Administrative Officer

7.3 Capacity:**7.4 Official stamp or seal:****8 INFORMATION ON THE NATIONAL HIGHER EDUCATION SYSTEM**

See next page.

8. INFORMATION ON THE NATIONAL HIGHER EDUCATION SYSTEM

The Finnish education system consists of basic education, general and vocational upper secondary education, higher education and adult education. The basic education consists of a 9-year compulsory school for all children from 7 to 16 years of age.

Post-compulsory education is given by general upper secondary schools and vocational institutions. The general upper secondary school provides a 3-year general education curriculum, at the end of which the pupil takes the national Matriculation examination (ylioppilastutkinto / studentexamen). Vocational institutions provide 3-year programmes, which lead to upper secondary vocational qualifications (ammattillinen perustutkinto / yrkesinriktad grundexamen).

General eligibility for higher education is given by the Matriculation examination and the upper secondary vocational qualification. These qualifications require at least 12 years of schooling. Equivalent foreign qualifications also give general eligibility for higher education.

The Finnish higher education system comprises of universities (yliopisto / universitet) and polytechnics (ammattikorkeakoulu, AMK / yrkeshögskola, YH). All universities engage in both education and research and have the right to award doctorates. The polytechnics are multi-field institutions of professional higher education. Polytechnics engage in applied research and development. The polytechnics use the terms polytechnic or university of applied sciences when referring to themselves. This higher education system description uses the term polytechnic.

Higher education studies are measured in credits (opintopiste / studiepoäng). Study courses are quantified according to the work load required. One year of studies is equivalent to 1600 hours of student work on the average and is defined as 60 credits. The credit system complies with the European Credit Transfer and Accumulation System (ECTS).

8.1. University degrees

The Government Decree on University Degrees (794/2004) defines the objectives, extent and overall structure of degrees. The universities decide on the detailed contents and structure of the degrees they award. They also decide on their curricula and forms of instruction.

8.1.1. First-cycle university degree

The first-cycle university degree consists of at least 180 credits (3 years of full-time study). The degree is called kandidaatti / kandidat in all fields of study except Law (oikeusnotaari / rättsnotarie) and Pharmacy (farmaseutti / farmaceut). The determined English translation for all these degrees is Bachelor's degree, the most common degrees being the Bachelor of Arts or Bachelor of Science.

Studies leading to the degree provide the student with: (1) knowledge of the fundamentals of the major and minor subjects or corresponding study entities or studies included in the degree programme and the prerequisites for following developments in the field; (2) knowledge and skills needed for scientific thinking and the use of scientific methods or knowledge and skills needed for artistic work; (3) knowledge and skills needed for studies leading to a higher university degree and for continuous learning; (4) a capacity for applying the acquired knowledge and skills to work; and (5) adequate language and communication skills.

Studies leading to the degree may include: basic and intermediate studies; language and communication studies; interdisciplinary programmes; other studies and work practice for professional development. The degree includes a Bachelor's thesis (6 - 10 credits).

8.1.2. The second-cycle university degree

The second-cycle university degree consists of at least 120 credits (2 years of full-time study). The extent of studies required for a programme leading to the second cycle university degree which is geared towards foreign students is a minimum of 90 credits. The degree is usually called maisteri / magister. Other second-cycle degree titles are diplomi-insinööri / diplomingenjör (Technology), provisor / provisor (Pharmacy) and arkkitehti / arkitekt (Architecture). The determined English translation for all these degrees is Master's degree, the most common degrees being the Master of Arts or Master of Science. The second-cycle university degree title in the fields of Medicine, Veterinary Medicine and Dentistry is lisensiaatti / licentiat, the English title being Licentiate. The admission requirement for the second-cycle university degree is a first-cycle degree.

In the fields of Medicine and Dentistry the university may arrange the education leading to the second-cycle university degree without including a first-cycle university degree in the education. In Medicine the degree consists of 360 credits (6 years of full-time study) and in Dentistry the degree consists of 300 credits (5 years of full-time study).

Studies leading to the second-cycle university degree provide the student with: (1) good overall knowledge of the major subject or a corresponding entity and conversance with the fundamentals of the minor subject or good knowledge of the advanced studies included in the degree programme; (2) knowledge and skills needed to apply scientific knowledge and scientific methods or knowledge and skills needed for independent and demanding artistic work; (3) knowledge and skills needed for independently operating as an expert and developer of the field; (4) knowledge and skills needed for scientific or artistic postgraduate education; and (5) good language and communication skills.

The studies leading to the second-cycle university degree may include: basic and intermediate studies and advanced studies; language and communication studies; interdisciplinary study programmes; other studies; and internship improving expertise. The degree includes a Master's thesis (20 - 40 credits).

8.2. Doctoral degrees

Students can apply for doctoral studies after the completion of a relevant second-cycle degree. The aim of doctoral studies is to provide student with an in-depth knowledge of their field of research and capabilities to produce novel scientific knowledge independently.

A pre-doctoral degree of lisensiaatti / licentiat (Licentiate) may be taken before the Doctor's degree and in general it takes 2 years of full-time study to complete.

The Doctor's degree takes approximately 4 years to complete after the second-cycle degree or 2 further years following the pre-doctoral degree. A student who has been admitted to complete the Doctor's degree must complete a given amount of studies, show independent and critical thinking in the field of research and write a Doctor's dissertation and defend it in public.

8.3. Polytechnic degrees

The government decree on polytechnics (352/2003 including amendments) defines the objectives, extent and overall structure of polytechnic degrees. The Ministry of Education and Culture confirms the degree programmes of polytechnics, and within the framework of these regulations, the polytechnics decide on the content and structure of their degrees in more detail. The polytechnics also decide on their annual curricula and forms of instruction.

8.3.1. First-cycle polytechnic degrees

The first-cycle polytechnic degree consists of 180, 210 or 240 credits (3 to 4 years of full-time study) depending on the study field. For specific reasons, the Ministry of Education and Culture may confirm the scope of the degree to exceed 240 credits. The first-cycle polytechnic degree is called ammattikorkeakoulututkinto / yrkeshögskoleexamen. The determined English translation for the degree is Bachelor's degree. The degree titles indicate the field of study, e.g. Bachelor of Engineering or Bachelor of Health Care.

Studies leading to the degree provide the student with (1) broad overall knowledge and skills with relevant theoretical background for working as expert of the field; (2) knowledge and skills needed for following and advancing developments in the field; (3) knowledge and skills needed for continuous learning; (4) adequate language and communication skills; and (5) knowledge and skills required in the field internationally.

The first-cycle polytechnic degree comprises basic and professional studies, elective studies, a practical training period and a Bachelor's thesis or a final project.

8.3.2. The second-cycle polytechnic degrees

The second-cycle polytechnic degree consists of 60 or 90 credits (1 or 1.5 years of full-time study). The degree is called ylempi ammattikorkeakoulututkinto / högre yrkeshögskoleexamen. The determined English translation for the second-cycle polytechnic degree is Master's degree. The degree titles indicate the field of study, e.g. Master of Culture and Art or Master of Business Administration. Eligibility for second-cycle polytechnic degrees is given by a relevant first-cycle degree with at least 3 years of relevant work or artistic experience.

Studies leading to the degree provide the student with (1) broad and advanced knowledge and skills for developing the professional field as well as the theoretical skills for working in demanding expert and leadership positions in the field; (2) profound understanding of the field, its relation to work life and society at large as well as the knowledge and skills needed for following and analysing both theoretical and professional developments in the field; (3) capacity for life-long learning and continuous development of one's own expertise (4) good language and communication skills required in work life; and (5) knowledge and skills needed to function and communicate in the field internationally.

The second-cycle polytechnic degree comprises advanced professional studies, elective studies and a final thesis or a final project.

FM Juha-Matti Huuskon väitöskirjan Methods for Complex ODEs Based on Localization, Integration and Operator Theory hyväksyminen

Vastaväittäjä, professori Shamil Makhmudov (Department of Mathematics & Statistics, Sultan Qaboos University, Muscat, Oman), puoltaa väitöskirjan hyväksymistä opinnäytteenä filosofian tohtorin tutkintoa varten ja esittää arvosanaksi hyväksytty. Väittelijällä ei ole huomautettavaa lausunnosta. Vastaväittäjän lausunto on esityslistan liitteenä.

Esitys: Tiedekuntaneuvosto päättää FM Juha-Matti Huuskon väitöskirjan hyväksymisestä ja arvostelee sen arvosanalla hyväksytty.

Päätös: Esityksen mukainen.

Asianmukaisesti allekirjoitetusta ja tarkastetusta pöytäkirjasta kirjoitetun otteen oikeaksi todistaa

Anna-Leena Nylund
Pöytäkirjanpitäjä

Juha-Matti Aleksanteri Huusko

(200487-093K)

on suorittanut valtioneuvoston asetuksen 794/2004 mukaisen
filosofian maisterin tutkinnon aineenopettajan koulutuksessa.

	Opintopisteet	Arvosana
PÄÄAINE: MATEMATIIKKA		
Syventävät opinnot	72,0	Kiitettävä

Tutkinnon suorittanut on osoittanut
yliopistojen tutkinnoista annetun asetuksen
(794/2004) mukaisen kielitaidon aiemmin
suorittamassaan tutkinnossa.

Pääaineen opintoihin sisältyvä pro gradu -tutkielma on hyväksytty
arvosanalla *kiitettävä*.

SIVUAINEET

Fysiikka		
Aineopinnot	38,0	Erinomainen
Opettajan pedagogiset opinnot	35,0	Erinomainen

MUUT OPINNOT 57,0

TUTKINNON KOKONAISLAAJUUS 202,0

Joensuussa, syyskuun 20. päivänä 2013
Luonnontieteiden ja metsätieteiden
tiedekunnan puolesta

TIMO JÄÄSKELÄINEN, DEKAANI

KAISA LAITINEN, HALLINTOPÄÄLLIKKÖ

Tähän tutkintotodistukseen kuuluu kaksi liitettä. Opintosuoritusotteessa esitetään tutkintoon kuuluvat opinnot ja kansainväliseen käyttöön tarkoitettussa Diploma Supplement -liitteessä tiedot yliopistosta sekä tutkintotodistuksessa tarkoitetuista opinnoista, niiden tasosta ja asemasta koulutusjärjestelmässä.

Opintosuoritusten arvostelu

5/5 = erinomainen
 4/5 = kiitettävä
 3/5 = hyvä
 2/5 = tyydyttävä
 1/5 = välttävä
 tai HYV = hyväksytty

Toisen kotimaisen kielen hyväksytty taito arvostellaan asteikolla tyydyttävä taito (T) tai hyvä taito (H). Toisen kotimaisen kielen numeerinen arvostelu sijoittuu asteikolla seuraavasti: 1-3 = tyydyttävä taito (T), 4-5 = hyvä taito (H).

Tutkielmien ja väitöskirjan arvostelu

L = laudatur
 ECL = eximia cum laude approbatur
 MCL = magna cum laude approbatur
 CL = cum laude approbatur
 NSA = non sine laude approbatur
 LA = lubenter approbatur
 A = approbatur
 tai

 K/E kiitettävä/erinomainen
 H hyvä
 T tyydyttävä
 V välttävä

Opintojen mitoituksen peruste on opintopiste. Yhden lukuvuoden opintojen suorittamiseen keskimäärin vaadittava 1 600 tunnin työpanos vastaa 60 opintopistettä.

Perusopintojen laajuus on vähintään 25 opintopistettä. Aineopintojen laajuus on yhdessä perusopintojen kanssa vähintään 60 opintopistettä. Syventävien opintojen laajuus on vähintään 60 opintopistettä.

Explanation of Transcript Grading Systems:

5/5	Excellent
4/5	Very good
3/5	Good
2/5	Satisfactory
1/5	Sufficient
Pass	Course completed successfully

Approved courses in the Second Domestic Language (Swedish or Finnish) are graded with the scale satisfactory (T) - good (H). The numerical grading scale of the Second Domestic Language is the following: 1-3 = satisfactory (T), 4-5 = good (H).

Grading of thesis and dissertation:

L	laudatur
ECL	eximia cum laude approbatur
MCL	magna cum laude approbatur
CL	cum laude approbatur
NSA	non sine laude approbatur
LA	lubenter approbatur
A	approbatur
or	
AppD	Approved with Distinction
App	Approved
or	
K/E	Excellent
H	Good
T	Satisfactory
V	Sufficient

The measure for the extent of studies shall be a credit point. The average input of 1600 working hours needed for studies of one academic year shall correspond to 60 credits.

The combined extent of basic and intermediate studies shall be a minimum of 60 credits.

DIPLOMA SUPPLEMENT

This Diploma Supplement follows the model developed by the European Commission, Council of Europe and UNESCO/CEPES. The purpose of this supplement is to provide sufficient independent data to improve the international 'transparency' and fair academic and professional recognition of qualifications (diplomas, degrees, certificates, etc.). It is designed to provide a description of the nature, level, context, content and status of the studies that were pursued and successfully completed by the individual named on the original qualification to which this supplement is appended. It should be free of any value-judgements, equivalence statements or suggestions about recognition. Information should be provided in all eight sections. Where information is not provided, a reason should be given.

1 INFORMATION IDENTIFYING THE HOLDER OF THE QUALIFICATION

1.1 Family name(s):	Huusko
1.2 Given name(s):	Juha-Matti Aleksanteri
1.3 Date of birth (day/month/year):	20.04.1987
1.4 Student identification number or code:	175783

2 INFORMATION IDENTIFYING THE QUALIFICATION

2.1 Name of qualification and title conferred (in original language):	Filosofian maisteri (Master of Science)
2.2 Main field(s) of study for the qualification:	Mathematics
2.3 Name and status of awarding institution (in original language):	Itä-Suomen yliopisto / Luonnontieteiden ja metsätieteiden tiedekunta (University of Eastern Finland / Faculty of Science and Forestry), state recognised university, Decree on Higher Education Degree Structure 464/1998. The quality assurance system of the university has passed the audit conducted by the Finnish Higher Education Evaluation Council. The auditing certificate is valid for six years (until 24.3.2017).
2.4 Name and status of institution (if different from 2.3) administering studies:	Not applicable
2.5 Language(s) of instruction/examination:	Finnish

3 INFORMATION ON THE LEVEL OF THE QUALIFICATION

3.1 Level of qualification:	Second-cycle university degree. See 8.
3.2 Official length of programme:	The degree consists of at least 120 credits, 2 years of full-time study. Finnish credits are fully compatible with the ECTS.
3.3 Access requirement(s):	The admission requirement for the second-cycle university degree is a first-cycle degree (See 8.1.1.).

4 INFORMATION ON THE CONTENTS AND RESULTS GAINED

4.1 Mode of study:	Full-time
4.2 Programme requirements:	The education shall provide the student with: (1) good overall knowledge of the major subject or a corresponding entity and conversance with the fundamentals of the minor subject or good

DIPLOMA SUPPLEMENT

knowledge of the advanced studies included in the degree programme;

(2) knowledge and skills needed to apply scientific knowledge and scientific methods or knowledge and skills needed for independent and demanding artistic work;

(3) knowledge and skills needed for independently operating as an expert and developer of the field;

(4) knowledge and skills needed for scientific or artistic postgraduate education; and

(5) good language and communication skills.

The education shall be based on scientific research or artistic activity and professional practices in the field.

4.3 Programme details (e.g., modules or units studied), and the individual grades/marks/credits obtained

(if this information is available on an official transcript this should be used here.):

4.4 Grading scheme and, if available, grade distribution guidance:

See transcript of records.

Study attainments are assessed on the scale pass-fail. Passed study attainments can also be assessed on the following grading scale: sufficient (1), satisfactory (2), good (3), very good (4), and excellent (5). Furthermore, theses completed in advanced studies, licentiate theses and doctoral dissertations can be graded on the following seven-stage scale: approbatur, lubenter approbatur, non sine laude approbatur, cum laude approbatur, magna cum laude approbatur, eximia cum laude approbatur and laudatur; or on the scale satisfactory, good and excellent; or on the scale pass and pass with distinction.

The assessment of language skills in the second domestic language uses the scale satisfactory-good; as laid down in the Act on the Knowledge of Languages Required of Personnel in Public Bodies (Laki julkisyhteisöjen henkilöstöltä vaadittavasta kielitaidosta 424/2003) and the Government Decree on the Demonstration of Language Skills in the Finnish and Swedish Languages in State Administration (Valtioneuvoston asetus suomen ja ruotsin kielen taidon osoittamisesta valtioneuvostossa 481/2003).

Not applicable

4.5 Overall classification of the qualification:

DIPLOMA SUPPLEMENT

5 INFORMATION ON THE FUNCTION OF THE QUALIFICATION

5.1 Access to further study:

Eligible for doctoral studies.

The admissions decisions are made in the receiving higher education institution.

5.2 Professional status:

Under the Finnish legislation, a person who has taken the degree of Master of Science is qualified for posts or positions in the public sector for which the qualification requirement is a second cycle higher education degree. In some cases, the qualification requirement also includes the completion of minor or major studies in certain specified fields of study. In Finland, the teacher's profession is regulated by national legislation. The eligibility requirements for teaching posts and positions are stated in the Teaching Qualifications Decree (986/1998).

The degree (completed by Huusko, Juha-Matti Aleksanteri) is in compliance with the eligibility requirements for subject teachers. It qualifies the holder to provide subject teaching both in upper secondary education and in basic education (age group 7-19) in the following subjects: Physics, Mathematics.

The degree falls under the Article 11 of the Directive 2005/36/EC of the European Parliament and of the Council on the recognition of professional qualifications, level e.

6 ADDITIONAL INFORMATION

6.1 Additional information:

Joensuun yliopisto (University of Joensuu) and Kuopion yliopisto (University of Kuopio) have merged into Itä-Suomen yliopisto (University of Eastern Finland), as of 1.1.2010. Both Joensuun yliopisto and Kuopion yliopisto were state recognised universities.

8 INFORMATION ON THE NATIONAL HIGHER EDUCATION SYSTEM

See next page.

8. INFORMATION ON THE NATIONAL HIGHER EDUCATION SYSTEM

The Finnish education system consists of basic education, general and vocational upper secondary education, higher education and adult education. The basic education consists of a 9-year compulsory school for all children from 7 to 16 years of age.

Post-compulsory education is given by general upper secondary schools and vocational institutions. The general upper secondary school provides a 3-year general education curriculum, at the end of which the pupil takes the national Matriculation examination (ylioppilastutkinto / studentexamen). Vocational institutions provide 3-year programmes, which lead to upper secondary vocational qualifications (ammattillinen perustutkinto / yrkesinriktad grundexamen).

General eligibility for higher education is given by the Matriculation examination and the upper secondary vocational qualification. These qualifications require at least 12 years of schooling. Equivalent foreign qualifications also give general eligibility for higher education.

The Finnish higher education system comprises of universities (yliopisto / universitet) and polytechnics (ammattikorkeakoulu, AMK / yrkeshögskola, YH). All universities engage in both education and research and have the right to award doctorates. The polytechnics are multi-field institutions of professional higher education. Polytechnics engage in applied research and development. The polytechnics use the terms polytechnic or university of applied sciences when referring to themselves. This higher education system description uses the term polytechnic.

Higher education studies are measured in credits (opintopiste / studiepoäng). Study courses are quantified according to the work load required. One year of studies is equivalent to 1600 hours of student work on the average and is defined as 60 credits. The credit system complies with the European Credit Transfer and Accumulation System (ECTS).

8.1. University degrees

The Government Decree on University Degrees (794/2004) defines the objectives, extent and overall structure of degrees. The universities decide on the detailed contents and structure of the degrees they award. They also decide on their curricula and forms of instruction.

8.1.1. First-cycle university degree

The first-cycle university degree consists of at least 180 credits (3 years of full-time study). The degree is called kandidaatti / kandidat in all fields of study except Law (oikeusnotaari / rättsnotarie) and Pharmacy (farmaseutti / farmaceut). The determined English translation for all these degrees is Bachelor's degree, the most common degrees being the Bachelor of Arts or Bachelor of Science.

Studies leading to the degree provide the student with: (1) knowledge of the fundamentals of the major and minor subjects or corresponding study entities or studies included in the degree programme and the prerequisites for following developments in the field; (2) knowledge and skills needed for scientific thinking and the use of scientific methods or knowledge and skills needed for artistic work; (3) knowledge and skills needed for studies leading to a higher university degree and for continuous learning; (4) a capacity for applying the acquired knowledge and skills to work; and (5) adequate language and communication skills.

Studies leading to the degree may include: basic and intermediate studies; language and communication studies; interdisciplinary programmes; other studies and work practice for professional development. The degree includes a Bachelor's thesis (6 - 10 credits).

8.1.2. The second-cycle university degree

The second-cycle university degree consists of at least 120 credits (2 years of full-time study). The extent of studies required for a programme leading to the second cycle university degree which is geared towards foreign students is a minimum of 90 credits. The degree is usually called maisteri / magister. Other second-cycle degree titles are diplomi-insinööri / diplomingenjör (Technology), proviisori / provisor (Pharmacy) and arkkitehti / arkitekt (Architecture). The determined English translation for all these degrees is Master's degree, the most common degrees being the Master of Arts or Master of Science. The second-cycle university degree title in the fields of Medicine, Veterinary Medicine and Dentistry is lisensiaatti / licentiat, the English title being Licentiate. The admission requirement for the second-cycle university degree is a first-cycle degree.

In the fields of Medicine and Dentistry the university may arrange the education leading to the second-cycle university degree without including a first-cycle university degree in the education. In Medicine the degree consists of 360 credits (6 years of full-time study) and in Dentistry the degree consists of 300 credits (5 years of full-time study).

Studies leading to the second-cycle university degree provide the student with: (1) good overall knowledge of the major subject or a corresponding entity and conversance with the fundamentals of the minor subject or good knowledge of the advanced studies included in the degree programme; (2) knowledge and skills needed to apply scientific knowledge and scientific methods or knowledge and skills needed for independent and demanding artistic work; (3) knowledge and skills needed for independently operating as an expert and developer of the field; (4) knowledge and skills needed for scientific or artistic postgraduate education; and (5) good language and communication skills.

The studies leading to the second-cycle university degree may include: basic and intermediate studies and advanced studies; language and communication studies; interdisciplinary study programmes; other studies; and internship improving expertise. The degree includes a Master's thesis (20 - 40 credits).

8.2. Doctoral degrees

Students can apply for doctoral studies after the completion of a relevant second-cycle degree. The aim of doctoral studies is to provide student with an in-depth knowledge of their field of research and capabilities to produce novel scientific knowledge independently.

A pre-doctoral degree of lisensiaatti / licentiat (Licentiate) may be taken before the Doctor's degree and in general it takes 2 years of full-time study to complete.

The Doctor's degree takes approximately 4 years to complete after the second-cycle degree or 2 further years following the pre-doctoral degree. A student who has been admitted to complete the Doctor's degree must complete a given amount of studies, show independent and critical thinking in the field of research and write a Doctor's dissertation and defend it in public.

8.3. Polytechnic degrees

The government decree on polytechnics (352/2003 including amendments) defines the objectives, extent and overall structure of polytechnic degrees. The Ministry of Education and Culture confirms the degree programmes of polytechnics, and within the framework of these regulations, the polytechnics decide on the content and structure of their degrees in more detail. The polytechnics also decide on their annual curricula and forms of instruction.

8.3.1. First-cycle polytechnic degrees

The first-cycle polytechnic degree consists of 180, 210 or 240 credits (3 to 4 years of full-time study) depending on the study field. For specific reasons, the Ministry of Education and Culture may confirm the scope of the degree to exceed 240 credits. The first-cycle polytechnic degree is called ammattikorkeakoulututkinto / yrkeshögskoleexamen. The determined English translation for the degree is Bachelor's degree. The degree titles indicate the field of study, e.g. Bachelor of Engineering or Bachelor of Health Care.

Studies leading to the degree provide the student with (1) broad overall knowledge and skills with relevant theoretical background for working as expert of the field; (2) knowledge and skills needed for following and advancing developments in the field; (3) knowledge and skills needed for continuous learning; (4) adequate language and communication skills; and (5) knowledge and skills required in the field internationally.

The first-cycle polytechnic degree comprises basic and professional studies, elective studies, a practical training period and a Bachelor's thesis or a final project.

8.3.2. The second-cycle polytechnic degrees

The second-cycle polytechnic degree consists of 60 or 90 credits (1 or 1.5 years of full-time study). The degree is called ylempi ammattikorkeakoulututkinto / högre yrkeshögskoleexamen. The determined English translation for the second-cycle polytechnic degree is Master's degree. The degree titles indicate the field of study, e.g. Master of Culture and Art or Master of Business Administration. Eligibility for second-cycle polytechnic degrees is given by a relevant first-cycle degree with at least 3 years of relevant work or artistic experience.

Studies leading to the degree provide the student with (1) broad and advanced knowledge and skills for developing the professional field as well as the theoretical skills for working in demanding expert and leadership positions in the field; (2) profound understanding of the field, its relation to work life and society at large as well as the knowledge and skills needed for following and analysing both theoretical and professional developments in the field; (3) capacity for life-long learning and continuous development of one's own expertise (4) good language and communication skills required in work life; and (5) knowledge and skills needed to function and communicate in the field internationally.

The second-cycle polytechnic degree comprises advanced professional studies, elective studies and a final thesis or a final project.

Juha-Matti Aleksanteri Huusko

(s. 20.04.1987)

on suorittanut valtioneuvoston asetuksen 794/2004 mukaisen

luonnontieteiden kandidaatin tutkinnon aineenopettajan koulutuksen mukaisesti.

	(Opintopisteet)	(Arvosana)
PÄÄAINE: MATEMATIIKKA		
Perus- ja aineopinnot	74,0	Erinomainen

Pääaineen opintoihin sisältyvä kandidaatin
tutkielma (10 op) on arvosteltu arvosanalla *erinomainen*.

SIVUAINEET		
Fysiikka, perusopinnot	25,0	Erinomainen
Aineenopettajan pedagogiset opinnot	25,0	Hyvä

KIELI- JA VIESTINTÄOPINNOT 8,0

MUUT TUTKINTOON SIS. OPINNOT 48,0
(sisältää 32 op matematiikan opintoja).

TUTKINNON KOKONAISLAAJUUS 180,0

Tutkinnon suorittanut on saanut
suomenkielisen koulusivistyksen ja
kirjoittanut tutkintoon sisältyvän
kypsyysnäytteen suomen kielellä.

Tutkinnon suorittanut on osoittanut
julkisyhteisöjen henkilöstöltä vaadittavasta
kielitaidosta annetun lain (424/2003) 6 §:n 1
momentin mukaan kaksikielisessä
viranomaisessa valtion henkilöstöltä
vaadittavaa toisen kielen taitoa seuraavasti:
ruotsin kielen *hyvä* suullinen taito ja
hyvä kirjallinen taito.

Hän on lisäksi osoittanut yliopistojen
tutkinnoista annetun asetuksen (794/2004)
6 §:n 2 momentin mukaisen vieraan kielen
taidon englannin kielessä.

Joensuussa, helmikuun 15. päivänä 2013

Opintosuoritusten arvostelu

5/5 = erinomainen
 4/5 = kiitettävä
 3/5 = hyvä
 2/5 = tyydyttävä
 1/5 = välttävä
 tai HYV = hyväksytty

Toisen kotimaisen kielen hyväksytty taito arvostellaan asteikolla tyydyttävä taito (T) tai hyvä taito (H). Toisen kotimaisen kielen numeerinen arvostelu sijoittuu asteikolla seuraavasti: 1-3 = tyydyttävä taito (T), 4-5 = hyvä taito (H).

Tutkielmien ja väitöskirjan arvostelu

L = laudatur
 ECL = eximia cum laude approbatur
 MCL = magna cum laude approbatur
 CL = cum laude approbatur
 NSA = non sine laude approbatur
 LA = lubenter approbatur
 A = approbatur
 tai
 khv kiittäen hyväksytty
 hvv hyväksytty
 tai
 K/E kiitettävä/erinomainen
 H hyvä
 T tyydyttävä
 V välttävä

Opintojen mitoituksen peruste on opintopiste. Yhden lukuvuoden opintojen suorittamiseen keskimäärin vaadittava 1 600 tunnin työpanos vastaa 60 opintopistettä.

Perusopintojen laajuus on vähintään 25 opintopistettä. Aineopintojen laajuus on yhdessä perusopintojen kanssa vähintään 60 opintopistettä. Syventävien opintojen laajuus on vähintään 60 opintopistettä.

V Sufficient

The measure for the extent of studies shall be a credit point. The average input of 1600 working hours needed for studies of one academic year shall correspond to 60 credits.

The combined extent of basic and intermediate studies shall be a minimum of 60 credits.

DIPLOMA SUPPLEMENT

This Diploma Supplement follows the model developed by the European Commission, Council of Europe and UNESCO/CEPES. The purpose of this supplement is to provide sufficient independent data to improve the international 'transparency' and fair academic and professional recognition of qualifications (diplomas, degrees, certificates, etc.). It is designed to provide a description of the nature, level, context, content and status of the studies that were pursued and successfully completed by the individual named on the original qualification to which this supplement is appended. It should be free of any value-judgements, equivalence statements or suggestions about recognition. Information should be provided in all eight sections. Where information is not provided, a reason should be given.

1 INFORMATION IDENTIFYING THE HOLDER OF THE QUALIFICATION

- 1.1 *Family name(s):* Huusko
1.2 *Given name(s):* Juha-Matti Aleksanteri
1.3 *Date of birth (day/month/year):* 20.04.1987
1.4 *Student identification number or code:* 175783

2 INFORMATION IDENTIFYING THE QUALIFICATION

- 2.1 *Name of qualification and title conferred (in original language):* (Bachelor of Science)
2.2 *Main field(s) of study for the qualification:* Mathematics
2.3 *Name (in original language) and status of awarding institution:* Itä-Suomen yliopisto / Luonnontieteiden ja metsätieteiden tiedekunta
(University of Eastern Finland / Faculty of Science and Forestry),
state recognised university, Decree on Higher Education Degree Structure 464/1998.
The quality assurance system of the university has passed the audit conducted by the Finnish Higher Education Evaluation Council. The auditing certificate is valid for six years (until 24.3.2017).
2.4 *Name and status of institution (if different from 2.3) administering studies:* Not applicable
2.5 *Language(s) of instruction/examination:* Finnish

3 INFORMATION ON THE LEVEL OF THE QUALIFICATION

- 3.1 *Level of qualification:* First-cycle university degree. See 8.
3.2 *Official length of programme:* The degree consists of at least 180 credits, 3 years of full-time study. Finnish credits are fully compatible with the ECTS.
3.3 *Access requirement(s):* The Finnish Matriculation Examination gives general eligibility for higher education. General eligibility is also given by Finnish upper secondary vocational qualifications. These qualifications require at least 12 years of schooling. Equivalent foreign qualifications also give general eligibility for higher education.

There is numerus clausus, i.e. restricted entry, to all fields of study. See 8.

DIPLOMA SUPPLEMENT

4 INFORMATION ON THE CONTENTS AND RESULTS GAINED

4.1 Mode of study:

Full-time

4.2 Programme requirements:

The bachelor's degree consists of major studies or studies in corresponding multidisciplinary entities in basic and intermediate level, minor studies, language and communication studies as well as other academic studies. At the end of the studies the student composes a bachelor's thesis.

The aim of the degree is to provide a student with knowledge of the fundamentals of the major or the corresponding multidisciplinary entity and the major subject, knowledge and skills needed for scientific thinking and the use of scientific methods as well as adequate language and communication skills.

Major studies or studies in corresponding multidisciplinary entity include foundations of theoretical and methodological studies in a major subject. Minor studies may be compulsory or may be chosen freely. With optional minor studies a student may steer the degree to his/her professional aims. Professionally oriented studies in languages and communication include courses in written and speech communication in Finnish and Swedish (the official languages in Finland) and at least one foreign language, usually English.

The studies towards the degree provide the student with facilities for administrative and planning posts. Studies leading to a lower university degree shall provide the student with:

- (1) knowledge of the fundamentals of the major and minor subjects or corresponding study entities or studies included in the degree programme and the prerequisites for following developments in the field;
- (2) knowledge and skills needed for scientific thinking and the use of scientific methods or knowledge and skills needed for artistic work;
- (3) knowledge and skills needed for studies leading to a higher university degree and for continuous learning;
- (4) a capacity for applying the acquired knowledge and skills to work; and
- (5) adequate language and communication skills.

The education shall be based on research or artistic activity and professional practices.

DIPLOMA SUPPLEMENT

4.3 Programme details:

4.5 Overall classification of the qualification:

5 INFORMATION ON THE FUNCTION OF THE QUALIFICATION

5.1 Access to further study:

Eligible for second cycle higher education studies. The admissions decisions are made in the receiving higher education institution.

DIPLOMA SUPPLEMENT

5.2 Professional status:

Under the Finnish legislation, a person who has taken the degree of Bachelor of Science is qualified for posts or positions in the public sector for which the qualification requirement is a first cycle higher education degree. In some cases, the qualification requirement also includes the completion of minor or major studies in certain specified fields of study. The degree falls under the Article 11 of the Directive 2005/36/EC of the European Parliament and of the Council on the recognition of professional qualifications, level d.

6 ADDITIONAL INFORMATION

6.1 Additional information:

Joensuun yliopisto (University of Joensuu) and Kuopion yliopisto (University of Kuopio) have merged into Itä-Suomen yliopisto (University of Eastern Finland), as of 1.1.2010. Both Joensuun yliopisto and Kuopion yliopisto were state recognised universities.

8 INFORMATION ON THE NATIONAL HIGHER EDUCATION SYSTEM

See next page.

8. INFORMATION ON THE NATIONAL HIGHER EDUCATION SYSTEM

The Finnish education system consists of basic education, general and vocational upper secondary education, higher education and adult education. The basic education consists of a 9-year compulsory school for all children from 7 to 16 years of age.

Post-compulsory education is given by general upper secondary schools and vocational institutions. The general upper secondary school provides a 3-year general education curriculum, at the end of which the pupil takes the national Matriculation examination (ylioppilastutkinto / studentexamen). Vocational institutions provide 3-year programmes, which lead to upper secondary vocational qualifications (ammattillinen perustutkinto / yrkesinriktad grundexamen).

General eligibility for higher education is given by the Matriculation examination and the upper secondary vocational qualification. These qualifications require at least 12 years of schooling. Equivalent foreign qualifications also give general eligibility for higher education.

The Finnish higher education system comprises of universities (yliopisto / universitet) and polytechnics (ammattikorkeakoulu, AMK / yrkeshögskola, YH). All universities engage in both education and research and have the right to award doctorates. The polytechnics are multi-field institutions of professional higher education. Polytechnics engage in applied research and development. The polytechnics use the terms polytechnic or university of applied sciences when referring to themselves. This higher education system description uses the term polytechnic.

Higher education studies are measured in credits (opintopiste / studiepoäng). Study courses are quantified according to the work load required. One year of studies is equivalent to 1600 hours of student work on the average and is defined as 60 credits. The credit system complies with the European Credit Transfer and Accumulation System (ECTS).

8.1. University degrees

The Government Decree on University Degrees (794/2004) defines the objectives, extent and overall structure of degrees. The universities decide on the detailed contents and structure of the degrees they award. They also decide on their curricula and forms of instruction.

8.1.1. First-cycle university degree

The first-cycle university degree consists of at least 180 credits (3 years of full-time study). The degree is called kandidaatti / kandidat in all fields of study except Law (oikeusnotaari / rättsnotarie) and Pharmacy (farmaseutti / farmaceut). The determined English translation for all these degrees is Bachelor's degree, the most common degrees being the Bachelor of Arts or Bachelor of Science.

Studies leading to the degree provide the student with: (1) knowledge of the fundamentals of the major and minor subjects or corresponding study entities or studies included in the degree programme and the prerequisites for following developments in the field; (2) knowledge and skills needed for scientific thinking and the use of scientific methods or knowledge and skills needed for artistic work; (3) knowledge and skills needed for studies leading to a higher university degree and for continuous learning; (4) a capacity for applying the acquired knowledge and skills to work; and (5) adequate language and communication skills.

Studies leading to the degree may include: basic and intermediate studies; language and communication studies; interdisciplinary programmes; other studies and work practice for professional development. The degree includes a Bachelor's thesis (6 - 10 credits).

8.1.2. The second-cycle university degree

The second-cycle university degree consists of at least 120 credits (2 years of full-time study). The extent of studies required for a programme leading to the second cycle university degree which is geared towards foreign students is a minimum of 90 credits. The degree is usually called maisteri / magister. Other second-cycle degree titles are diplomi-insinööri / diplomingenjör (Technology), proviisori / provisor (Pharmacy) and arkkitehti / arkitekt (Architecture). The determined English translation for all these degrees is Master's degree, the most common degrees being the Master of Arts or Master of Science. The second-cycle university degree title in the fields of Medicine, Veterinary Medicine and Dentistry is lisensiaatti / licentiat, the English title being Licentiate. The admission requirement for the second-cycle university degree is a first-cycle degree.

In the fields of Medicine and Dentistry the university may arrange the education leading to the second-cycle university degree without including a first-cycle university degree in the education. In Medicine the degree consists of 360 credits (6 years of full-time study) and in Dentistry the degree consists of 300 credits (5 years of full-time study).

Studies leading to the second-cycle university degree provide the student with: (1) good overall knowledge of the major subject or a corresponding entity and conversance with the fundamentals of the minor subject or good knowledge of the advanced studies included in the degree programme; (2) knowledge and skills needed to apply scientific knowledge and scientific methods or knowledge and skills needed for independent and demanding artistic work; (3) knowledge and skills needed for independently operating as an expert and developer of the field; (4) knowledge and skills needed for scientific or artistic postgraduate education; and (5) good language and communication skills.

The studies leading to the second-cycle university degree may include: basic and intermediate studies and advanced studies; language and communication studies; interdisciplinary study programmes; other studies; and internship improving expertise. The degree includes a Master's thesis (20 - 40 credits).

8.2. Doctoral degrees

Students can apply for doctoral studies after the completion of a relevant second-cycle degree. The aim of doctoral studies is to provide student with an in-depth knowledge of their field of research and capabilities to produce novel scientific knowledge independently.

A pre-doctoral degree of lisensiaatti / licentiat (Licentiate) may be taken before the Doctor's degree and in general it takes 2 years of full-time study to complete.

The Doctor's degree takes approximately 4 years to complete after the second-cycle degree or 2 further years following the pre-doctoral degree. A student who has been admitted to complete the Doctor's degree must complete a given amount of studies, show independent and critical thinking in the field of research and write a Doctor's dissertation and defend it in public.

8.3. Polytechnic degrees

The government decree on polytechnics (352/2003 including amendments) defines the objectives, extent and overall structure of polytechnic degrees. The Ministry of Education and Culture confirms the degree programmes of polytechnics, and within the framework of these regulations, the polytechnics decide on the content and structure of their degrees in more detail. The polytechnics also decide on their annual curricula and forms of instruction.

8.3.1. First-cycle polytechnic degrees

The first-cycle polytechnic degree consists of 180, 210 or 240 credits (3 to 4 years of full-time study) depending on the study field. For specific reasons, the Ministry of Education and Culture may confirm the scope of the degree to exceed 240 credits. The first-cycle polytechnic degree is called ammattikorkeakoulututkinto / yrkeshögskoleexamen. The determined English translation for the degree is Bachelor's degree. The degree titles indicate the field of study, e.g. Bachelor of Engineering or Bachelor of Health Care.

Studies leading to the degree provide the student with (1) broad overall knowledge and skills with relevant theoretical background for working as expert of the field; (2) knowledge and skills needed for following and advancing developments in the field; (3) knowledge and skills needed for continuous learning; (4) adequate language and communication skills; and (5) knowledge and skills required in the field internationally.

The first-cycle polytechnic degree comprises basic and professional studies, elective studies, a practical training period and a Bachelor's thesis or a final project.

8.3.2. The second-cycle polytechnic degrees

The second-cycle polytechnic degree consists of 60 or 90 credits (1 or 1.5 years of full-time study). The degree is called ylempi ammattikorkeakoulututkinto / högre yrkeshögskoleexamen. The determined English translation for the second-cycle polytechnic degree is Master's degree. The degree titles indicate the field of study, e.g. Master of Culture and Art or Master of Business Administration. Eligibility for second-cycle polytechnic degrees is given by a relevant first-cycle degree with at least 3 years of relevant work or artistic experience.

Studies leading to the degree provide the student with (1) broad and advanced knowledge and skills for developing the professional field as well as the theoretical skills for working in demanding expert and leadership positions in the field; (2) profound understanding of the field, its relation to work life and society at large as well as the knowledge and skills needed for following and analysing both theoretical and professional developments in the field; (3) capacity for life-long learning and continuous development of one's own expertise (4) good language and communication skills required in work life; and (5) knowledge and skills needed to function and communicate in the field internationally.

The second-cycle polytechnic degree comprises advanced professional studies, elective studies and a final thesis or a final project.

Aikavälin suoritettut opinnot

490,00

Kaikki suoritettut opinnot

490,00

* Lasketaan yhteismäärään

** Hyväksiluettu. Hyväksiluetulla opinnoilla on opinnojen alkuperäinen suorituspäivämäärä.

Opintosuoritusten arvostelu

5/5 = erinomainen

4/5 = kiitettävä

3/5 = hyvä

2/5 = tyydyttävä

1/5 = välttävä

tai HYV = hyväksytty

Toisen kotimaisen kielen hyväksytty taito arvostellaan asteikolla tyydyttävä taito (T) tai hyvä taito (H). Toisen kotimaisen kielen numeerinen arvostelu sijoittuu asteikolla seuraavasti: 1-3 = tyydyttävä taito (T), 4-5 = hyvä taito (H).

Tutkielmien ja väitöskirjan arvostelussa käytetään myös asteikoita

L = laudatur

ECL = eximia cum laude approbatur

MCL = magna cum laude approbatur

CL = cum laude approbatur

NSA = non sine laude approbatur

LA = lubenter approbatur

A = approbatur

tai

khyv kiittäen hyväksytty

hyv hyväksytty

tai

K/E kiitettävä/erinomainen

H hyvä

T tyydyttävä

V välttävä

Opintojen mitoituksen peruste on opintopiste. Yhden lukuvuoden opintojen suorittamiseen keskimäärin vaadittava 1 600 tunnin työpanos vastaa 60 opintopistettä.
